

De Leon Melendez, Jesus Manuel
Manager: Carbonneau, Kerri - Sr Mgr-RF

2020 Year End

Engr IV Cslt-RF

Best Networks Nationwide

- Support the regions to meet the following goals nationwide:

Solution Types	National Goal
New Capacity Macro	1,495
Capacity Small Cells	3,857
Macro Capacity Overlay	4,002
CNC Overlay	1,945
CBRS	1,475
FDMIMO	185
Service Gap Fill-in New Build	475
Save the License Projects	581
5G UWB Sites With Funding	21,751
5G UWB POR	16,462
2020 UWB 80% Confidence	14,295
5G Nationwide (850 NR)	14,846
ICL Conversions to NR	1,186

- Deliver Industry Leading Metrics & Measurements against external benchmarks
 - Root Metrics Overall Wins $\geq 90\%$
 - Root Average Index Score = 96
 - Root Throughput (4DL/2UL) - 90%
 - Ookla in session experience = 97%
 - Ookla/Tutela Customer experience (Video) - 80%

I've support Upstate and NYM on prioritizing their solutions and maintaining pool numbers. In NYM case we have not released more solutions due to their current pool count. Weekly meetings have been scheduled to maintain communication of all initiatives and possible changes in strategy throughout the year. There has been a constant effort to clean the databases in order to make the best possible decisions for the network.

De Leon Melendez, Jesus Manuel 7/1/2020

YE: Below are the NW year end results, we missed the FDMIMO goals for 2020 but all other collectible data achieved the goal and or exceeded it.

Jesus support UPNY and NYM and strives to ensure we are moving the proper projects into the pool and preserving data integrity. He is in constant communication with this sub markets and provides support to help them achieve their goals.

Support the regions to meet the following goals nationwide:

Solution Types	National Goal	
New Capacity Macro	1,495	Year End 2020 Actual= 1,499 Goal Met
Capacity Small Cells	3,857	Year End 2020 Actual=4,075 Goal Met
Macro Capacity Overlay	4,002	Year End 2020 Actual= 6,162 Goal Met
CNC Overlay	1945 *Note reduced to 379 due to give back*	Year End 2020 Actual=463 Goal Met
CBRS	1,475	Year End 2020 Actual=2,084 Goal Met

ICL Conversions to NR	1,186	

MY: Jesus supports his sub-markets by ensuring that all solutions that are going into the pool meet the traffic priority and business objectives. He is in constant contact with his sub-markets and strives to ensure that they are moving forward with the business needs. He has performed many data base updates in an effort to ensure data integrity for his sub-markets. NYM has come a long way in this area and Jesus should continue to focus here until NYM is fully on board with pools and data integrity efforts.

Lots of great work here Jesus, keep up the focus it shows!

Solution Types	National Goal	Mid Year Qty	% to Goal MY

Carbonneau, Kerri 1/20/2021

Collaborate with the Capital Allocation, and Standards and Systems Teams Plan on Process and Communi

- "One voice" from Territory when communicating to the submarkets
- Partner on tool enhancements, tickets, and testing of new features
- Stay on same page with directions and communications prior to sending out requests and details for action to the regions
- Limit the emergency communications and confusing, conflicting messages
- Partner with peer teams on audits, data vetting, and review of proposed system/methodology/formula changes

As part of the OneVoice approach I began the year with an Analytics roadshow for my regions to explain the different initiatives and keep up with the tools being developed to make data driven decisions. Additionally, the aforementioned meetings have helped keep the region aware of the company's direction.

The development of a new vision for the RF- ToDo list in FP is another project I've been collaborating with the Standards team and the RFEs on a national level, which is currently pending the creation of the feature request to be done early in Q3.

On a broader approach I've updated rationales for 850NR early in the year as well as auditing and removing older rationales when they were updated. Nationally I also help update the database for SSPTs in FP. I've also actively participated in our teams meetings helping with audits and the improvement of our methodologies as well as some FP ticket troubleshooting and have wrote several how to guides for FP users including SSPT and STL solution creations.

De Leon Melendez, Jesus Manuel 7/1/2020

YE: Jesus support one voice by working on various projects with the west and ensuring we are all on the same page. He strives hard to keep connected with his West counter parts and ensures constant communication.

His work with the RF TO DO list, True Offload dashboard and NYM special scenarios haven't gone unnoticed. He has learned Tableau quickly also assisted in enhancing the team knowledge of Tableau. He is always willing to help and what he doesn't know he find sources to help him learn.

Jesus has supported major projects such as SNAP, LS6, STL and has lead the RELO process for the east territory team.

MY: Jesus has been the lead on the RF to do list in FP, this much needed enhancement will assist the RF engineers on focusing on the worst sectors for action and project creation. Jesus took the time to gather feedback nation wide and make appropriate changes to the user interface. He created a enhancement ticket and has been working with the core team scheduling the enhancement into FP.

Jesus efforts relating to multiple rational changes and updates such as STL and NR and sectors splits have helped the business move forward in

a more streamline/standard fashion.

Nice work here Jesus!

YE: Jesus support one voice by working on various projects with the west and ensuring we are all on the same page. He strives hard to keep connected with his West counter parts and ensures constant communication.

His work with the RF TO DO list,

MY: Jesus has been the lead on the RF to do list in FP, this much needed enhancement will assist the RF engineers on focusing on the worst sectors for action and project creation. Jesus took the time to gather feedback nation wide and make appropriate changes to the user interface. He created a enhancement ticket and has been working with the core team scheduling the enhancement into FP.

Jesus efforts relating to multiple rational changes and updates such as STL and NR and sectors splits have helped the business move forward in a more streamline/standard fashion.

Nice work here Jesus!

Carbonneau, Kerri 1/20/2021

East/West Traffic Processes

- Work with the East/West to come to common processes related to traffic, including but not limited to:
 - Release Process/Monthly/Qrtly Meeting content
 - Priority of solutions pre- and post-release
 - One voice with regards to communication to the regions
 - Ensure that Status/POR/BPY are in sync with definitions

In terms of traffic process, I've been working with a new pre/post report for offload calculation with other engineers. Objective of this initiative is to create a feedback loop into the system by comparing what we planned for with the final result of implementations. When we got the additional temporary AWS licenses from Dish due to the pandemic I was in charge of helping the Samsung markets with the initial analysis and site selection. AWS3 capacity analysis based on bbu and radio limitations- work with different stake holders to do a preliminary evaluation of capable sectors to determine feasibility of adding AWS loaned frequencies at a 0 dollar cost.

De Leon Melendez, Jesus Manuel 7/1/2020

YE: Jesus True offload dashboard is a great visual and informative view of the benefits to traffic when a solutions goes on air. It has a great map view, provides insight to not only traffic but also RF and SP. I am excited for this to be used by the Traffic team and others. Jesus is always working on BPY and POR changes for his sub markets, he supports rationale changes and is always willing to help.

MY: Jesus supported his sub-markets by having monthly meetings and ensuring that the priority release process was followed for solutions into the pool. He maintained pool qty for UPNY, NYM although he brought them down is still high qty wise. Jesus should continue to work with them and through pool refresh we will work together to bring them down to a pool level that is posted and followed accordingly.

Jesus has worked with UPNY and NYM on BPY to ensure they are up to date and as accurate as possible, he has made great progress here and should continue to maintain the BPY and POR information for proper funding allocation.

Jesus worked with the east on the AWS3 deployment during the COVID crisis, he was diligent assisted with site review to ensure that we could deploy the borrowed spectrum. His efforts helped our customers and the business in a time of crisis.

Awesome work Jesus!

Carbonneau, Kerri 1/20/2021

Model Credo Behaviors

Model our Credo every day through my work.

As a member of the territory traffic team I model the credo by putting our customer first. In our job that means spending time on the issues that can help improve our processes by cleaning up and syncing data between Fuze Planning, SPM and Sitetracker in order to help communication between our RF, Real Estate and Engineering teams.

I aim to participate on our numerous meetings with the goal of improving customer experience in an efficient manner. During these meetings I try to enable teamwork by promoting discussion as we try to improve and streamline our solution delivery process. Often times I find myself giving offline feedback to team leaders as an observant in the discussion to try to bring people closer together.

De Leon Melendez, Jesus Manuel 7/1/2020

YE: As we all worked remote in the COVID pandemic Jesus managed his work load, provided necessary information and was always willing to help others on the team. He always thinks about the customer and how performing work could impact their service. He supports the team and the network through countless efforts and is always professional.

MY: Jesus is a great listener he understands the needs of his sub-markets and is always willing to assist in any way possible. He is always thinking about RF and other teams and tries to see their view when making decisions that impacts those teams. He is a great collaborator, worked with John Wakim on the offload effectiveness data and has brought the traffic aspect into the view as well as attempting to work with the inbldg team for effectiveness of solutions.

Jesus should continue to collaborate with the other teams to ensure we are enhancing the experience of our customers and our processes.

During this trying time of COVID, Jesus supported the AWS3 temporary deployment and has done a great job working remotely to support the network. Thank you Jesus!

Carbonneau, Kerri 1/20/2021

Support 5G

- Ensure all 5G related projects are released as quickly as possible to ensure success of the mmWave and NR programs
- Support the regions with any rationale updates and ensure data integrity
- Ensure 200M pops are covered with low band 5G, 80% Q1 and 100% Q2

All 5G related work/evaluation has been done with the required urgency. Releases have been on time and all issues have been addressed. I've also worked with the regions on cleaning the rationales for the 5GNW dashboard.

De Leon Melendez, Jesus Manuel 7/1/2020

YE: Jesus supported multiple 5G efforts this year, LS6. 5G NW, MMW, by ensure projects were correct and accounted for. He was constantly communicating to his sub markets and striving for dashboard accountability in quantities.

The company exceeded the 200M pops coverage objective for 2020, great work by the team and thank you for your support on this objective Jesus!

MY: Jesus has worked with his sub-markets to ensure that 5G solutions are in the view of RE and PM and in SPM. He has worked on releasing the projects and assisted with issues in FP. He has made updates to rationale as necessary and ensures data integrity with each change requested. He follows the traffic guidelines for changes and ensures changes are the necessary and for business purposes. He has worked to clean up the 5G dashboard to ensure pops coverage and appropriate counting for leadership.

Carbonneau, Kerri 1/20/2021

Triggers/Funnels/3-Year Outlook

- Ensure we have a targeted approach to capacity triggers
- Target 8.6% triggers at national, territory, and submarket levels (see table below for goals)
- Ensure funnels/pipelines/pools are properly sized, managed, and maintained (3-year outlook)
- Ensure pools are reflected accurately in Fuze Planning
- Track the QCI7 growth and its impact on the network

Nationwide
Trigger % 8.60%

New Territory: Target Trigger
%

Mid-South 7.40%

Northeast 8.70%

West 9.80%

Old Territory	New Territory	Region	Target Trigger %
East	Mid-South	Carolina/Tennessee	6.20%
East	Mid-South	Florida	10.80%
East	Mid-South	Georgia/Alabama	5.50%
East	Mid-South	Michigan/Indiana/KY	7.70%
East	Mid-South	Pennsylvania/WV/Ohio	4.10%
East	Northeast	New England	12.00%
East	Northeast	New York Metro	3.70%
East	Northeast	Tri-State	4.80%
East	Northeast	Upstate	11.70%
East	Northeast	W/B - Virginia	11.60%
West	Mid-South	Great Plains	11.10%
West	Mid-South	Illinois/Wisconsin	8.20%
West	West	Central Texas	10.50%
West	West	Houston/Gulf Coast	14.90%
West	West	Kansas/Missouri	10.70%
West	West	Mountain	8.50%
West	West	Northern California/Nevada	7.10%
West	West	Pacific Northwest	7.90%
West	West	Southern California	8.60%
West	West	Southwest	8.50%

Every effort is being done to at least maintain the trigger levels as expected. NYM is well below the expectation and is expected to achieve the goal. UPNY is more challenging. I've verified POR projects with the region engineers to ensure we have symbiotic solutions in place. Im also working on some inconsistencies found in the pro-forma being worked on (Sectors from PA being counted in UPNY). More focus will be needed on this front to identify opportunities for trigger percent improvement.

De Leon Melendez, Jesus Manuel 7/1/2020

YE: Please see the trigger % and goals that were obtained for 2020.

Both NYM and UPNY met the target goals for 2020. Jesus supported them my ensuring proper releases and also shared his knowledge with his sub markets. Due to COVID our traffic patterns have changed in general, we also have rather large pools which could have resulted in less than favorable trigger percentages.

Let's keep the focus here and 2021 and ensure pools are sized and adhered to for budget and spending.

Pulled from APT 1/8/2020	Target Trigger %	Trigger % NOV 2020
Nation Wide	8.60%	6.40%
GLS	7.40%	4.77%
WEST	9.80%	8.66%

North East	8.70%	5.67%
Region	Target Trigger %	Trigger % NOV 2020
CATN	6.20%	4.20%
CGC	14.90%	15.80%
CTX	10.50%	12.00%
FL	10.80%	6.80%
GAAL	5.50%	4.80%
GP	11.10%	6.00%
ILWI	8.20%	4.40%
KSMO	10.70%	6.10%
MIK	7.70%	4.30%
MTN	8.50%	4.60%
NCA	7.10%	6.10%
NE	12.00%	8.70%
NJPH	4.80%	2.10%
NYM	3.70%	0.60%
OPW	4.10%	3.70%
PNW	7.90%	4.60%
SCA	8.60%	7.90%
SW	8.50%	6.20%
UPNY	11.70%	11.20%
WBV	11.60%	7.10%

MY: Jesus has done part by ensuring that all rationales are up to date and than trigger levels are being addressed by the next best solution available to be released into the pool. By using the priority method and ensuring strong triggers are addressed the trigger % should continue to decline. Jesus has done his part to ensure understanding is his sub-markets, there has always been a challenge in NYM and he continues to collaborate and work with them to provide the why, and how we do what we do to ensure the business if moving in the proper direction.

Since COVID hit there are several declining traffic KPIS and it shows in the triggering % below.

UPNY remains at the top of the triggering sub-markets nation wide, Jesus should continue to push the worst of the worst into the pool for action by RE. Jesus does a great job in ensuring meeting time lines are met and changes are communicated clearly.

	Target	MY%
Nationwide Trigger %	8.60%	6.40%

New Territory:

Mid-South (GLS)	7.40%	4.90%
Northeast	8.70%	5.60%
West	9.80%	7.40%

Old Territory	New Territory	Region	Target Trigger %	MY%
---------------	---------------	--------	------------------	-----

East	Mid-South	Carolina/Tennessee	6.20%	4.20%
East	Mid-South	Florida	10.80%	5.40%
East	Mid-South	Georgia/Alabama	5.50%	4.80%
East	Mid-South	Michigan/Indiana/KY	7.70%	5.30%
East	Mid-South	Pennsylvania/WV/Ohio	4.10%	2.80%
East	Northeast	New England	12.00%	7.20%
East	Northeast	New York Metro	3.70%	0.30%
East	Northeast	Tri-State	4.80%	4.10%
East	Northeast	Upstate	11.70%	13.70%

West	West	Northern California/Nevada	7.10%	3.80%
West	West	Pacific Northwest	7.90%	4.30%
West	West	Southern California	8.60%	3.70%
West	West	Southwest	8.50%	5.30%

Carbonneau, Kerri 1/20/2021

Get more familiar with Time series analysis

Complete training on Time Series Analysis by the end of the year. Get more expertise in the use of both Python and Tableau to gain insights on capacity data and/or improve processes within the team.

Overall Assessment

Overall Performance Summary

Jesus will be rated performing for year end 2020.

Key highlights this year include wrapping up the TO DO list, regardless of where it landed after your efforts. This effort did not go unnoticed, timing and understanding were issues on the progress with SAFE involved.

The True Off load dash board which I hope to be made a office norm, will assist more than traffic. Jesus should promote this and ensure it is being used as well as enhanced.

Supporting UPNY & NYM, ensuring that they are on the same page and communication of changes, were a strength of Jesus's in 2020.

Supporting the team with RF procedures as well as Tableau how to's was fun to watch.

His work with the RELO process and driving changes in the process due to limited funds, and working with planning to establish the how to was a need that transcends the traffic team.

Employee Comments:

Although a challenging year, 2020 was exciting and productive. Data skills added will be used as a stepping stone going forward to address more challenges in the upcoming future. Initiatives such as the true offload dashboard and the NPP to do list which started during the year should be completed for 2021. Focus for 2021 will be adding upon the successes of 2020.
