PROFESSIONAL SUMMARY

SENIOR DATA & ANALYTICS PROFESSIONAL

Tableau Expert | SQL & Python Analytics | ETL Automation | Executive Insights & KPI Strategy

Strategic Analytics Leader with 17+ years of progressive experience translating complex, multi-source data into quantifiable business insights for executive and operational stakeholders. Spent 13 years at Verizon leading end-to-end analytics across national capital portfolios exceeding \$4B — designing Tableau dashboards, automating SQL and Python ETL pipelines, and delivering KPI frameworks that drove measurable business outcomes. Expert in segmentation analysis, trend identification, and performance optimization across cross-functional environments. MBA-educated engineer with a proven ability to formulate goals, advise on strategy, and communicate findings clearly to Product, Technology, and Executive audiences.

CORE COMPETENCIES

- **Visualization: Tableau (Desktop/Server/Online)**, Advanced Dashboard Design, Power BI (Developing)
- **Tableau Specifics:** LOD Expressions, Advanced Parameters, Dashboard Actions, Performance Optimization (Data Extracts), Storyboarding, Workbook Versioning.
- **ETL & Automation:** SQL Pipeline Optimization (Teradata-compatible), Alteryx Designer/Server (Production), Python (Pandas/NumPy), GCP (BigQuery), Advanced Excel (Modeling/Pivot Tables).
- **Strategic Governance:** KPI/OKR Framework Design, Segmentation & Optimization Analysis, Goal Quantification, Budget Variance Tracking, Root-Cause Analysis, Cross-Functional Deliverables Management.

PROFESSIONAL EXPERIENCE

Senior Lead Data Engineer (Senior Engineer Consultant)

VERIZON WIRELESS | Basking Ridge, NJ | September 2024 – February 2026

- **ETL Pipeline & Dashboard Automation:** Architected automated SQL and Python ETL workflows to process and reconcile large-scale operational datasets, replacing manual reporting processes and reducing end-to-end pipeline execution time by 97% — enabling weekly and monthly dashboards to refresh reliably at scale.
- **End-to-End Tableau Ownership:** Designed and scaled a centralized suite of Tableau dashboards monitoring \$4B in annual capital spend, implementing complex **LOD expressions and interactive filters** that enabled VPs and branch leads to seamlessly isolate regional performance variables.

- **Trend Analysis & Actionable Insights:** Identified systemic performance inefficiencies across capital programs representing hundreds of millions in misallocated spend; synthesized segmentation analysis and trend patterns into executive-ready Tableau visualizations that drove strategic reallocation decisions at the VP level.
- **Data Quality & Performance Tuning:** Built automated data validation and metric monitoring pipelines via Python and SQL, establishing rigorous validation standards ensuring consistent data accuracy for executive-level reporting.
- **AI-Enhanced Analytics:** Applied AI-assisted query drafting and dashboard narrative generation with documented human review processes, reducing analysis cycle time while maintaining strict governance standards.

Strategic Data & Analytics Lead (Senior RF Engineer)

VERIZON WIRELESS | Basking Ridge, NJ | November 2017 – September 2024

- **Single Source of Truth Delivery:** Directed an intensive cross-functional project to reconcile and integrate two disparate legacy enterprise systems (RFDS/NPP). Established a validated single source of truth data platform that resolved 80% of historical system calculation mismatches.
- **Cross-Functional Analytics Delivery:** Served as the primary analytical liaison bridging Finance, Engineering, and Regional Operations — delivering business analyses tailored to each audience, from technical partners requiring methodology detail to VP and executive stakeholders requiring story-driven performance narratives.
- **Mentorship & Quality Standards:** Coached a cross-functional team of six analysts and regional partners, and coordinated agile deliverables across offshore development pods (India), establishing unified QA review protocols, dashboard templates, and visual standards.

RF Design Engineer III

VERIZON WIRELESS | West Nyack, NY | June 2014 – November 2017

- **Operational Scale:** Orchestrated the activation of **745 high-capital projects** in a single year, utilizing Tableau to track end-to-end reporting accuracy and market deployment velocity.
- **Strategic Cost Mitigation:** Developed visualization logic to prioritize Small Cell solutions, **reducing average monthly rent by 75%** while maintaining mission-critical coverage targets.

PORTFOLIO

MTA Transit Analytics Pipeline | dbt · BigQuery · GCP · Terraform · Python · Tableau
 ELT pipeline processing 120M+ rows of NYC subway ridership data across 472 stations. Applied segmentation analysis and trend modeling to surface service equity gaps, COVID recovery patterns, and congestion by district — demonstrating the same analytical approach used in customer transaction and web interaction analysis at scale.

- <https://github.com/ChuLion/mta-analytics-pipeline>

PR Housing Crisis & Affordability Analytics | Tableau Public · Python · PostGIS · CRIM Data

End-to-end real estate data pipeline for Puerto Rico — reverse-engineered undocumented government tax assessment APIs (CRIM), combined valuations with scraped listing data, and built geographic affordability dashboards surfacing tax equity gaps across municipalities. Published Tableau dashboard.
